- worked closely with product managers and designers to define a rich iOS experience to the user.
- Participated in code reviews and development of best practices.

## 📁 PROJECTS

### UPAJ - Kisan ka Super App

Upaj is a smart farming app revolutionizing agriculture. It provides farmers with precise crop advice, weather updates, and expert insights. With tools like satellite mapping and affordable crop insurance, Upaj simplifies farming for better results

**Link** : <https://apps.apple.com/in/app/upaj-kisan-ka-super-app/id6450405730>

**Language** : swift 5

**Design Pattern** : MVVM

### **iTrade - agri trading**

iTrade is an online platform for agricultural commodity trading. iTrade creates a country-wide network of buyers and suppliers for remote trading. With the intervention of digitization in the agriculture sector, both buyer and seller can create a trade by choosing a commodity of a specific grade from a desired location.

**Language :** swift 5

**Design Pattern :** MVVM

### **AgriBazaar - iOS**

agriBazaar is a one stop agri-trading platform that connects thousands of Indian farmers, traders, millers and processors located in 25+ states across the nation.

**Link :** <https://apps.apple.com/in/app/agribazaar/id1589192238>

**Language :** Swift 5

**Architecture :** MVC

### **Hood - Discover Truth**

Hood, a new age pseudonymous social network, empowers common people to stand up and share their true story without having to worry about being judged. Zorro wants you to be bold and unforgiving when it comes to unveiling the truth.

**Link :** <https://apps.apple.com/in/app/hood-discover-truth/id1587114504>

**Language :** Swift 5

**Architecture :** MVC

### **Agrigate**

Agrigate Operations is the internal Attendance App used by the employees of the Staragri group for attendance and other needs

**Link :** <https://apps.apple.com/in/app/agrigate-operations/id1247542710>

**Language :** Swift 5

**Architecture :** MVC

### **Tic Tac Toe (Android)**

Tic-tac-toe (also known as noughts and crosses or Xs and Os) is two players, X and O, who take turns marking the spaces in a 3×3 grid. The player who succeeds in placing three of their marks in a horizontal, vertical, or diagonal row wins the game.

**Link :** <https://github.com/Danish1111/TikTakToe>

### **College Admission App (Android)**

Application is mainly intended for students seeking information on various courses offered by ITM College and can also put your query related to admission through app.

**Link :** <https://github.com/Danish1111/collegeAdmissionApp-Android>

### **Calorie Counter (Android)**

calorie counter is fun and effective weight loss program! which maintains your daily calorie chart.

**Link :** <https://github.com/Danish1111/DailyCalorieCounter-Android>

## Commodity Testing using Machine Learning (Python)

Applied Machine Learning algorithms to find out the quality of Commodity and predict the quality using commodity size color and shape.

### SKILLS
